Cover Letter

Dear Hiring Manager:

Your job description of front end software engineer fits my experience and qualifications perfectly, and I am writing to express my interest in and enthusiasm for the position. As an accomplished software engineer, I have achieved server projects for companies during my career.

I'm currently working as a full stack software engineer in Tax 1on1 Inc. I have developed the Tax1on1 WeChat Official Account full stack project. And I'm also in charge of maintaining the front-end part of our Q&A website.

In addition to my desire to join your team, you will find I am a experienced software engineer (nearly 3 years in China, nearly 1 year in US) who has hands on programming experienced, know well about development cycle and can collaborate with different people with different background during the work. By finishing some projects before, I also have some basic knowledge on computer vision, deep learning, React. So I believe I match these requirements:

- Proficient understanding of HTML5, CSS3
- Experience developing applications with JavaScript Libraries using React
- Proficient understanding of cross-browser compatibility issues and ways to work around them
- Familiar with Test-Driven Development (TDD)
- Extensive experience with RESTful API design
- Familiarity with Photoshop
- 3+ years of experience with at least 1 year of frontend experience

I would like very much to meet with you to discuss your open positions for front end software engineers. Thank you for your time and consideration.

Sincerely yours,
Zack Zhao
